

## **STIHL RMA 750 V, RMA 756 V, RMA 7 RV**

### **NEW 7 SERIES BATTERY-POWERED LAWNMOWERS FOR PROFESSIONAL USE**

STIHL are launching three powerful and rugged new professional battery-powered lawnmowers, perfectly suited to demanding lawn care in noise-sensitive areas. An extension to the AP System, the new lawn mowers are equivalent in performance to the well-respected 7 series petrol models.

With a 48cm cutting width, the RMA 750 V is the smallest of the three new models. The RMA 756 V has a larger 54cm cutting width for faster working, while the RMA 7 RV is a dedicated mulching mower with no collection bag and a cutting width of 51cm.

The 7 series mowers are the first to feature in STIHL's exciting new Double AP Platform. Drawing power from 2 AP batteries, the mower utilises a 72 V motor to significantly increase the power output of the machine. This results in a mower capable of cutting large areas of overgrown grass, with no compromise in collection quality.

The mono-comfort handlebar is standard across all new models and is designed to improve access to the collection bag. The construction of the handlebar is extremely sturdy thanks to the aluminium console and steel upper section, ensuring reliable use in tough working conditions. It's also height adjustable and neatly folds over for compact transport and storage too.

All models benefit from variable speed transmission, adjustable in 5 steps from 0 – 6 km/h. The gearbox is protected by a sturdy cover, preventing damage and premature wear, and

the soft start feature prevents the lawn mower from jolting forward, for a more comfortable experience.

For maximum durability, the models feature a powder coated aluminium deck with an abrasion resistant inner casing made from polymer, which is easy and inexpensive to replace.

Three mowing modes are available to the operator, depending on the terrain being cut. Eco-mode automatically reduces the RPM when under light load to maximise battery working time. Standard mode can be used for day-to-day work, and finally Auto-Boost can be used to overcome particularly challenges patches of dense grass and vegetation.

The power setting and drive speed can easily be adjusted thanks to the intuitive controls and electronic display. Other parameters such as the battery charge level and Connectivity status can also be checked at a glance. With STIHL Connected built in to the lawnmower as standard, it's never been easier to monitor the working time and maintenance plan of your STIHL tool.

## About STIHL

It all started with a chainsaw, and to this day, it's still the product for which the STIHL brand is best known worldwide.

Ever since Andreas Stihl invented the first portable chainsaw, the STIHL name has stood for revolutionary technology, driven by significant investments in research and development and a single-minded passion for making people's lives easier when working in nature. It's because of this that STIHL has been the world's best-selling petrol chainsaw brand since 1971.

But the STIHL name is now synonymous with many other industries too, as well as with home gardeners looking for premium quality tools. The extensive STIHL range includes hedge and grass trimmers, multi-tools, pressure washers, construction tools, lawn mowers, lawn tractors, robotic mowers and of course, chainsaws.

A family-owned business based in Germany, STIHL employs over 19,000 people worldwide and sells products in more than 160 countries globally.

STIHL GB is a wholly-owned subsidiary of the global STIHL Group. In Great Britain, STIHL is available from a network of 750 STIHL Approved Dealers across Great Britain. A range of battery and electric products and accessories are also available from independent garden centres, Screwfix and [www.shop.stihl.co.uk](http://www.shop.stihl.co.uk).
