

## **GTA 40 PRUNER**

**The STIHL GTA 40 battery-powered pruner for professional arborists and landscapers**

Designed for tree care, the GTA 40 is the first professional pruner available in the STIHL AS System of battery-powered tools. Combining low weight and compact design with high cutting performance, the GTA 40 excels at pruning on the ground as well as maintenance and corrective pruning in trees by trained climbing arborists.

Thanks to the low weight, excellent balance and impressive cutting speed, the GTA 40 is a viable alternative to using top handled chainsaws for tree canopy maintenance. In areas of overgrown and dense foliage, the compact and slim design of the GTA 40 is a particular advantage.

Two AS System batteries provide enough charge for up to 190 cuts when cutting spruce with a diameter of 5x5 cm. Like all STIHL professional battery-powered tools, the batteries and the pruner are IPX4 certified, resulting in reliable use in rain and wet conditions.

Equipped with a 6" STIHL Light 01 guide bar with low-friction sprocket nose and a narrow STIHL 1/4" Picco saw chain, the GTA 40 ensures fast cutting performance and a smooth cutting result. The partially transparent chain oil tank ensures the operator is always aware of when the tank needs to be refilled.

Like many battery-powered tools, the GTA 40 is so quiet that no hearing protection is required, and to ensure the tool fits comfortably in your hand, the grip points are coated with a durable non-slip soft material. Features such as the lateral chain tensioner and charge level indicator also help to ensure effortless operation.

Suspension eyelets on both sides allow a lanyard to be attached. Alternatively, a holster is available as part of STIHL's X-Flex Harness System, for even greater ease of use. A heavy-duty storage and transport case is included with all GTA 40 sets, with ample room for the AL 5-2 multi-charger and up to 6 AS 2 batteries.

The GTA 40 pruner can be integrated into the cloud-based STIHL Connected system solution via a Smart Connector attached to the motor housing. This digital fleet management system offers professional users a detailed overview of the operating time of the tool, as well as upcoming maintenance tasks and maintenance history records.

## About STIHL

It all started with a chainsaw, and to this day, it's still the product for which the STIHL brand is best known worldwide.

Ever since Andreas Stihl invented the first portable chainsaw, the STIHL name has stood for revolutionary technology, driven by significant investments in research and development and a single-minded passion for making people's lives easier when working in nature. It's because of this that STIHL has been the world's best-selling petrol chainsaw brand since 1971.

But the STIHL name is now synonymous with many other industries too, as well as with home gardeners looking for premium quality tools. The extensive STIHL range includes hedge and grass trimmers, multi-tools, pressure washers, construction tools, lawn mowers, lawn tractors, robotic mowers and of course, chainsaws.

A family-owned business based in Germany, STIHL employs over 19,000 people worldwide and sells products in more than 160 countries globally.

STIHL GB is a wholly-owned subsidiary of the global STIHL Group. In Great Britain, STIHL is available from a network of 750 STIHL Approved Dealers across Great Britain. A range of battery and electric products and accessories are also available from independent garden centres, Screwfix and [www.shop.stihl.co.uk](http://www.shop.stihl.co.uk).
