

STIHL SHA 140 VACUUM SHREDDER

The first dedicated vacuum in STIHL's AP System of battery-powered tools

[IMAGE LIBRARY LINK](#)

Designed for professional landscapers and grounds maintenance teams, the SHA 140 vacuum shredder is the most powerful in the STIHL lineup, offering 15% improved suction power compared to the petrol SH 86. Ideal for the autumn and winter months, the SHA 140 makes light work of collecting and shredding leaves and green material.

The variable speed trigger provides the operator full control to match the power output to the task at hand, whether that's working around delicate flower beds, or utilising the boost mode to collect damp leaves. The reinforced suction tube can be used to loosen stubborn leaves, ensuring nothing is left behind.

The wide positioning of the rubberised handles ensures comfortable handling and excellent manoeuvrability, allowing the user to work quickly with minimal fatigue or arm strain. Perfect balance has also been achieved thanks to the central location of the battery between the handles. Like many battery-powered tools, the SHA 140 is lightweight and quiet in operation, eliminating the requirement for hearing protection.

Featuring an adjustable shoulder strap, the 55l collection bag sits comfortably at the operator's side without impairing movement. The robust metal buckle openings are able to withstand the toughest working conditions, while the large opening leads to quick and complete emptying with minimal effort. Ventilation openings can be used to deliver constant suction power, regardless of the fill level or the degree of dust and dirt in the bag.

Easy transport and storage have also been factored into the design, with fast and tool free removal of the catcher bag and suction tube to make dismantling the tool effortless.

With the recommended AP 300 S battery, the SHA 140 has a long working time of up to 60 minutes. For more information on STIHL's range of AP System tools, please visit www.stihl.co.uk.

About STIHL

It all started with a chainsaw, and to this day, it's still the product for which the STIHL brand is best known worldwide.

Ever since Andreas Stihl invented the first portable chainsaw, the STIHL name has stood for revolutionary technology, driven by significant investments in research and development and a single-minded passion for making people's lives easier when working in nature. It's because of this that STIHL has been the world's best-selling petrol chainsaw brand since 1971.

But the STIHL name is now synonymous with many other industries too, as well as with home gardeners looking for premium quality tools. The extensive STIHL range includes hedge and grass trimmers, multi-tools, pressure washers, construction tools, lawn mowers, lawn tractors, robotic mowers and of course, chainsaws.

A family-owned business based in Germany, STIHL employs over 19,000 people worldwide and sells products in more than 160 countries globally.

STIHL GB is a wholly-owned subsidiary of the global STIHL Group. In Great Britain, STIHL is available from a network of 750 STIHL Approved Dealers across Great Britain. A range of battery and electric products and accessories are also available from independent garden centres, Screwfix and www.shop.stihl.co.uk.
