

iMOW 3 EVO, iMOW 4 EVO

AUTONOMOUS ROBOTIC LAWN MOWERS FOR SMALL - MEDIUM LAWNS

The family of iMOW robotic mowers from STIHL continues to grow, this time with the new iMOW 3 and iMOW 4 EVO models. Suitable for lawns up to 500m² and 1000m² respectively, the iMOW EVO works automatically to create a lush and healthy lawn, leaving you with more time to spend enjoying the garden.

The iMOW mowing plan can be changed easily in the My iMOW App, allowing full control of when the mower gets to work. The iMOW can therefore work around your schedule, for example mowing on weekdays only, at night, or any combination of active times during the week. What's more, the iMOW works almost silently, preventing the mower from being a disturbance.

At the end of each mowing session, the iMOW automatically travels home to the charging station, ready to prepare for the next session. Thanks to the intelligent charging management system, the iMOW charges efficiently with minimal electricity usage, meaning the running cost is still significantly lower compared to a petrol walk behind lawn mower.

iMOW EVO models can be connected to the user's smartphone via Bluetooth, WiFi or via the phone network, meaning connectivity is possible from anywhere in the world. The electronic cutting height adjustment can also be changed via the My iMOW App, varying between 20 - 60 mm to suit different lawn types.

Sloping terrain and complex lawn shapes are no problem for the iMOW, and it doesn't rely on phone signal or being in line of sight of a receiver in order to work. Clear installation

instructions are included with the iMOW, alternatively our network of friendly and experienced STIHL Approved Dealers are on hand to look after the complete installation for you.

The new iMOW robotic mowers are equipped with a disc-cut mowing system which, in combination with the powerful batteries and intelligent charging management, ensures a perfectly mowed lawn in a comparatively short active mowing time.

To find out more about the iMOW 3 EVO and iMOW 4 EVO, visit www.stihl.co.uk or call in at your nearest STIHL Approved Dealer.

About STIHL

It all started with a chainsaw, and to this day, it's still the product for which the STIHL brand is best known worldwide.

Ever since Andreas Stihl invented the first portable chainsaw, the STIHL name has stood for revolutionary technology, driven by significant investments in research and development and a single-minded passion for making people's lives easier when working in nature. It's because of this that STIHL has been the world's best-selling petrol chainsaw brand since 1971.

But the STIHL name is now synonymous with many other industries too, as well as with home gardeners looking for premium quality tools. The extensive STIHL range includes hedge and grass trimmers, multi-tools, pressure washers, construction tools, lawn mowers, lawn tractors, robotic mowers and of course, chainsaws.

A family-owned business based in Germany, STIHL employs over 19,000 people worldwide and sells products in more than 160 countries globally.

STIHL GB is a wholly-owned subsidiary of the global STIHL Group. In Great Britain, STIHL is available from a network of 750 STIHL Approved Dealers across Great Britain. A range of battery and electric products and accessories are also available from independent garden centres, Screwfix and www.shop.stihl.co.uk.
